

# THE DOORS TO SUCCESS

Customised sliding doors are a great way to give your home a cool modern twist

## MEET THE TEAM

Anohid will be appearing at stand 270 at the Architect @ Work Parijs, Expo from 22-23 sept

**If you're thinking** of updating your home, there are many benefits to installing sliding doors. After all, they save space, they're more energy efficient and they give your house a sleek sense of style. Like anything else, if you want the best results, then the tailor-made approach is the way to go. Enter Anohid, specialists in elegant frameless doors, customised to your house. These include sliding doors, block doors and the company's own concept: The Anodoor.

The Anodoor replaces the traditional wooden block with a patented aluminium frame, and is fully customised according to the house's height and width, as well as the wall's thickness. The door is equipped with concealed hinges and an integrated rubber gasket.

There's also the Anohid Slide, which hides the guide rail from the naked eye. To produce this door, Anohid teamed up with Belgian architect Bruno Ericum, in order to create a series of doors that open and close smoothly and without noise.

When enhancing your house, make sure you get exactly what you want - having a stylish home could hinge upon choosing the right doors.
